

Enabling Smart Cities

Accelerate your career with Manarati as Head of IoT Platform (f/m)

Our Team

Manarati is an agile and high-performance driven startup. We are looking to further expand our business and step into new challenges for growth by building a software and operations team in one of the most exciting future oriented fields: **Smart Cities**

Your Profile

- University degree in an IT related subject (e.g. Business Informatics, Informatics etc.)
- 1-2 years professional experience working in a start-up or corporate IT role
- Experience with front-end development such as React, Redux, JavaScript or Docker
- Experience with back-end integration such as Python, Flask, Linux, Bash, Postgres and/or VerneMQ
- Preferable first programming-based work experience with Smart City applications & integration into an open API platform
- Passion for the Smart City industry, a high degree of intrinsic motivation to build a new product and company

About Manarati:

We are Manarati.

Our vision is to be the Smart City Enabler of the Middle East region.

Founded by innogy International Middle East in 2017, we provide a portfolio of Smart Lighting poles, nodes and a smart city software solution, enabling communities and cities to collect insightful and actionable data to enable smart city services. We believe that our planet will be a better place when we create a sustainable world in which people live and work in. Together with you we want to embark on this journey and establish a world-class innovative product developed in Dubai - **WE ARE ENABLING SMART CITIES!**

Your Tasks

- You lead the development of our current Smart City Platform solution
- You are in charge of building new use cases and modify current use case to fit client's requirements
- You are in charge of installing the software for new clients and maintenance of existing software implementations
